be thought of as an extension of the credit allocation process.

After an individual or business applies to a bank or financial institution for a loan, the lending institution analyzes the potential benefits and costs associated with the loan. Credit risk analysis is used to estimate the costs associated with the loan.

Lending, Types of

Credit Risk

In layman terms, Credit analysis is more about the identification of risks in situations where a potential for lending is observed by the Banks. Both quantitative and qualitative assessment forms a part of the overall appraisal of the clients (company/individual).

Credit analysis. Credit Analysis Credit analysis is the process of determining the ability of a company or person to repay their debt obligations. In other words, it is a process that determines a potential borrower's credit risk or default risk. It incorporates both qualitative and quantitative factors.
