It is a short autobiography. We all liked the fact that it started with Jane's life as a young girl and then detailed how she ended up working with chimps. It also discussed her life with the chimps in detail, how she set up camp (her mother stayed with her at first, which I think is a charming detail) and various adventures that she had.

About The Book. Inspired by a stuffed toy, Jane Goodall became the first woman to study chimps in the wild and in the process made history. As a child, Jane Goodall was given a stuffed chimpanzee named Jubilee, and she has said her fondness for this figure started her early love of animals. While others thought Jane would be terrified by the toy, she adored it and it inspired a life-long love of animals in her.

He'd observed small parties of resident chimpanzees go in and out. So, Dr. Boyer Ontl set up a camera facing the entrance of this "living room-sized" cave for 325 days between 2011 and 2013.

### **Why Chimp Moms Flock to Caves on the Savanna - The New ...**

Humans have evolved much longer lifespans than the great apes, which rarely exceed 50 years. Since 1800, lifespans have doubled again, largely due to improvements in environment, food, and medicine that minimized mortality at earlier ages. Infections cause most mortality in wild chimpanzees and in traditional forager-farmers with limited access to modern medicine. Although we know little of ...
